## 按照教程执行,结果如图:

## 在 demo.launch 文件加入 rviz 启动项:

<node pkg="rviz" type="rviz" name="rviz" args="-d \$(find grid\_path\_searcher)/launch/rviz\_config/demo.rviz"/>

在 home 下的.bashrc 加入 source ~/motion\_planning/motion\_planning\_ws/devel/setup.bash (新建了一个 workspace),新建命令行,执行: roslaunch grid\_path\_searcher demo.launch
